# BUOY

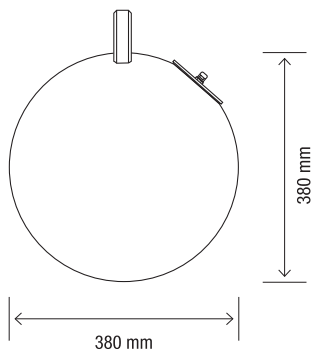

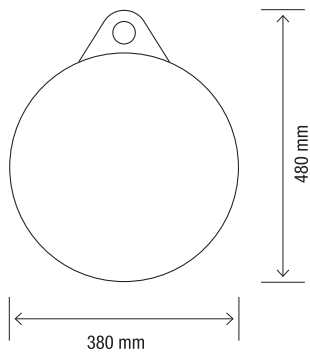

Valgusti Buoy sündis soovist luua portatiivne ja vastupidav välisvalgusti, mis samas oleks atraktiivne ka sisevalgustina. Buoy võib riputada majaseinale, asetada aianurka või seada terrassile, panna sadamakaile või kinnitada posti otsa - valgusti on projekteeritud vastu pidama nii erinevates kasutustingimustes.

Eri lahendusena pakume veekindlat versiooni.

Luminaire Buoy was created with the wish to create a portable and durable outdoor luminaire which at the same time would look attractive indoors. Buoy can be hung to the wall of the building, placed to the corner of the garden, put on the quay or fixed to the pole – the luminaire is designed to resist different conditions of use.

We also provide water proof version as special solution.

Disainer/Designer: Margus Triibmann
