KLIMP

Klimp on üks lõbus, kaasaegset mõttelaadi kandev, mugav, paindlik ja dünaamiline mööbliese, olls ka ilmastiku- ja vandalismikindel.

Pinki keerates tekivad uued vormid, mis kõik on kasutatavad istumiseks, nõjatumiseks või muidu mõnusaks äraolemiseks. Ühes oma põhiasendis meenutab Klimp vormilt traditsioonilisi pargipinke ning tubaseid sohvasid. Pingi teostamiseks on kaks valikut:

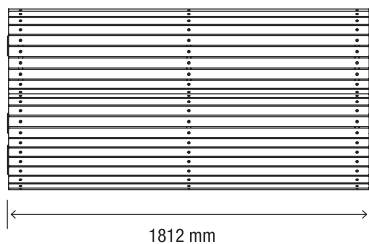

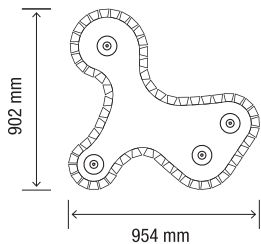

- kandekonstruktsiooni materjaliks on betoon, mis annab pingile stabiilsuse ja tugevuse, roovitusena kasutatakse taaskasutatud plastist valmistatud latte;
- kergema lahenduse korral on konstruktsiooni kandvaks ja kooshoidvaks elemendiks polüetüleenist (PE) karkass, millele kinnitub taaskasutatud plastist roovitus.

Klimp is funny, cozy, flexible and dynamic piece of furniture carrying a contemporary way of thinking and it is also weather as well as vandal proof. When you turn the bench, new forms emerge and they can all be used for sitting, leaning or just having fun. In one of its main positions, Klimp resembles a traditional park bench or a sofa at home.

There are two options for implementing the bench:

- Material for supporting structure is concrete which gives the bench stability and strength. Recycled plastic bars are used for open boarding.
- In case of a lighter version, the supporting and joining element is polyethylene (PE) frame supporting the recycled open boarding.
