PEATAKANA

Peatakana on multifunktsionaalne ja vastupidav plasttool, mis sobib kasutamiseks nii eramu hoovil kui avalikus linnaruumis, nii ajaloolises vanalinnas kui ka päikeselises mererannas. Tuulisest Tallinnast inspireeritud tooli saab kasutada kokku kolmes erinevas istesendis. Lisaks saab Peatakana kasutada ka valgustina nii õuealadel kui toas, aga ka suuremates esindusruumides.

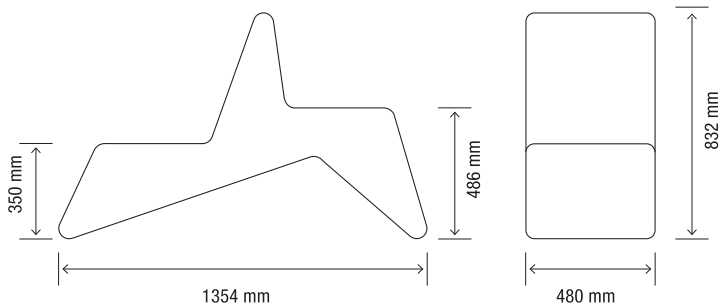

Rotovalu tehnoloogias valminud pink on äärmiselt ilmastikukindel. Materjal on taaskasutatav.

Peatakana is a multifunctional and durable plastic bench for use in a yard of a private house as well as a public city space, in historical old town as well as in a sunny beach. Bench inspired by windy Tallinn can be used in three different sitting positions.

Additionally the Peatakana can be used as a luminaire in a yard as well as inside but also in bigger representative rooms.

Bench made in rotational casting technology is extremely weather proof. Material is recyclable.

Disainer/Designer: Tarmo Luisk, Margus Triibmann, Ville Jehe

 Värv: Valge

 Värv: Antratsiidihall

 Värv: Oranz

 Värv: Roheline
